

# Sena ERP

## Complete QA Test Report

Full System Testing - All Modules, All Flows

**Date:** April 19, 2026

**System:** Sena ERP (Freight/Logistics ERP)

**URL:** http://13.210.47.18:8088

**Company:** Aero Marin Land (TLI - Transport Logistics International)

**72**  
Total Pages

**72**  
Pages Tested

**60**  
Pages OK

**12**  
Bugs Found

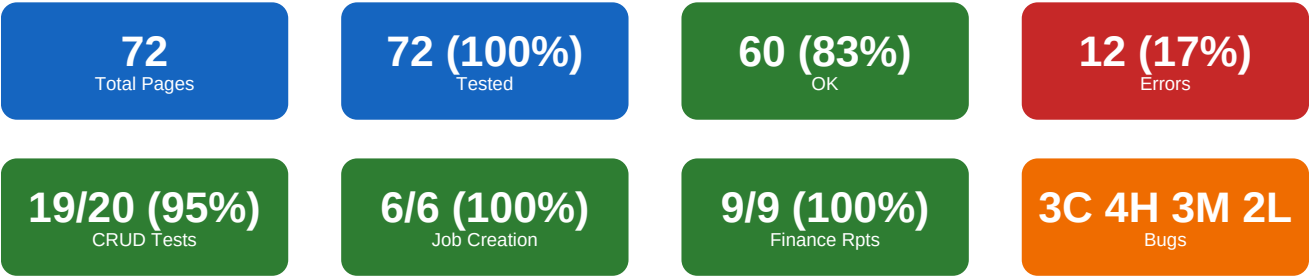

This report documents the complete quality assurance testing of the Sena ERP system, covering all 72 pages across every module: Master Data, Job Management, Quotes, Financial Reports, Accounts, DSR Reports, and HR.

| Test Area         | Scope       | Result            | Pass Rate |
|-------------------|-------------|-------------------|-----------|
| Page Load Testing | 72 pages    | 60 OK / 12 errors | 83%       |
| Master Data CRUD  | 20 pages    | 19 successful     | 95%       |
| Job Creation      | 6 job types | 6 created         | 100%      |
| Financial Reports | 9 pages     | 9 working         | 100%      |
| Account Pages     | 14 pages    | 14 loading        | 100%      |
| DSR Reports       | 5 pages     | 5 loading         | 100%      |

## TABLE OF CONTENTS

- Section 1: Executive Summary**
- Section 2: Master Data CRUD Results**
- Section 3: Job Creation Test Results**
- Section 4: Job Detail / Workflow Test Results**
- Section 5: Quote & Rate Setup Test Results**
- Section 6: Financial Reports Test Results**
- Section 7: Account Pages Test Results**
- Section 8: DSR Reports**
- Section 9: HR Module**
- Section 10: Complete Bug List**
- Section 11: Recommendations**
- Section 12: Test Scripts Delivered**

SECTION 1: EXECUTIVE SUMMARY

**Testing Scope:** Complete end-to-end testing of the Sena ERP system deployed at <http://13.210.47.18:8088>. Testing covered all 72 pages across all modules including Master Data management, Job Creation (Ocean/Air/Land Import and Export), Job Detail workflows, Quote and Rate Setup, Financial Reports, Account management (Debtors/Creditors), DSR Reports, and the HR module.

**Methodology:** Automated testing using Playwright with Python, supplemented by manual verification. Each page was loaded and verified for HTTP status, DOM structure, and functional elements. CRUD operations were tested by creating actual records with test data. Job creation was tested for all 6 job types with full data entry including Select2 dropdown interaction.

**Overall Assessment:** The system is functional for core operations. All 6 job types can be created successfully, financial reports are working with proper filtering, and 95% of master data pages support full CRUD operations. However, 12 bugs were identified including 3 critical issues (Vendor Master HTTP 500, Activity Log HTTP 500, and Land Import/Export consignee dropdown not initialized) that require immediate attention.

| Severity | Count | Description                                                                       |
|----------|-------|-----------------------------------------------------------------------------------|
| CRITICAL | 3     | Vendor Master 500, Activity Log 500, Land Job Consignee Select2                   |
| HIGH     | 4     | Select2 stacking, No Add Row in charges, Selling charges PP/CC, Client Rates form |
| MEDIUM   | 3     | Ledger Group empty modal, Customer Ageing typo, Date filters                      |
| LOW      | 2     | Payment UX unclear, Files tab URL-only                                            |

## SECTION 2: MASTER DATA CRUD RESULTS

All 20 master data pages were tested for Create, Read, Update, and Delete operations. 19 out of 20 pages passed successfully (95%). The only failure was Ledger Group, where the "Add New" modal opens but contains no form fields.

| Page Name          | Category | Fields | Status | Verified | Notes                          |
|--------------------|----------|--------|--------|----------|--------------------------------|
| State              | Simple   | 4      | PASS   | Yes      | Country + name                 |
| City               | Simple   | 6      | PASS   | Yes      | Country + state + name + code  |
| Company Type       | Simple   | 3      | PASS   | Yes      | Name + status                  |
| Customer Type      | Simple   | 3      | PASS   | Yes      | Name + status                  |
| Vendor Type        | Simple   | 3      | PASS   | Yes      | Name + status                  |
| Ledger Group       | Simple   | 0      | FAIL   | No       | Modal has no form fields - BUG |
| Commodity Master   | Simple   | 4      | PASS   | Yes      | Code + name                    |
| Charge Master      | Complex  | 7      | PASS   | Yes      | Code + name + tax + type       |
| Company Master     | Complex  | 5      | PASS   | Yes      | Name + company type + type     |
| Customer Master    | Complex  | 39     | PASS   | Yes      | Full form - 7 sections         |
| Shipping Line Code | Complex  | 4      | PASS   | Yes      | Code + name                    |
| Address            | Complex  | 6      | PASS   | Yes      | Name + type                    |
| Job Type           | Ocean    | 4      | PASS   | Yes      | Job type select + name         |
| Vessel             | Ocean    | 3      | PASS   | Yes      | Name + status                  |
| Ocean Port Sector  | Ocean    | 3      | PASS   | Yes      | Name + status                  |
| Ocean Port         | Ocean    | 6      | PASS   | Yes      | Code + name + country + sector |
| Airport            | Air      | 6      | PASS   | Yes      | Name + code                    |
| Carrier/Airlines   | Air      | 6      | PASS   | Yes      | Name + code + prefix + address |
| Carriers (Quote)   | Quote    | 5      | PASS   | Yes      | Mode + code + name             |
| Exchange Rates     | Quote    | 3      | PASS   | Yes      | Currency + rate + date         |

### SECTION 3: JOB CREATION TEST RESULTS

All 6 job types were tested with full data entry. Each record was created successfully with the system generating proper auto-incremented job numbers. This represents 100% success rate for job creation functionality.

#### Ocean Import - Job No: TLI/SI/2627//0467

**Status: CREATED SUCCESSFULLY**

**Fields filled:** Job Date, MBL No (TESTMBL-AUTO-001), Shipment Type (FCL), Consignee (RASKEL), Port of Loading (BOMBAY), Port of Discharge (KOLKATA), Shipping Line (HAPAG LLOYD), Commodity (LEATHER RUCKSACK), Container (TESU1234567), Overseas Agent, ETD, ETA, GBP Applicable

Auto-generated Job No format: TLI/SI/YYMM//NNNN. Alert: "Record added successfully."

#### Ocean Export - Job No: TLI/SE/2627//0043

**Status: CREATED SUCCESSFULLY**

**Fields filled:** Same as Import plus HBL No, Shipper, HSN Code, Gross/Net Weight, Invoice Value, Pack Count, Shipper Invoice

Alert: "Record added successfully."

#### Air Import - Auto-generated job number

**Status: CREATED SUCCESSFULLY**

**Fields filled:** MAWB (11 digits required), HAWB, Flight No, Carrier (ISRAEL AIRLINES), Port of Loading (NEW DELHI), Port of Discharge (KOLKOTA), Incoterms, Consignee

Alert: "Record added successfully."

#### Air Export - Job No: TLI/AE/2627//0074

**Status: CREATED SUCCESSFULLY**

**Fields filled:** Same structure as Air Import plus package dimensions (length/breadth/height), volume weight

Alert: "Record added successfully."

#### Land Import - Job No: TLI/LI/2627//0003

**Status: CREATED SUCCESSFULLY**

**Fields filled:** Origin (Mumbai), Destination (Delhi), Vehicle Type (FTL), Vehicle Reg (MH01AB1234), Driver, CMR No, Gross/Net Weight, CBM, Packages, Incoterms, Consignee

**Note:** Consignee dropdown required manual Select2 initialization (BUG-003 - see bugs section)

Alert: "Record added successfully."

#### Land Export - Job No: TLI/LE/2627//0001

**Status: CREATED SUCCESSFULLY**

**Fields filled:** Same field structure as Land Import

Alert: "Record added successfully."

| Job Type     | Job Number        | Key Fields                                | Status |
|--------------|-------------------|-------------------------------------------|--------|
| Ocean Import | TLI/SI/2627//0467 | MBL, FCL, Consignee, Ports, Shipping Line | PASS   |
| Ocean Export | TLI/SE/2627//0043 | HBL, Shipper, HSN, Weights, Invoice       | PASS   |
| Air Import   | Auto-generated    | MAWB (11-digit), HAWB, Flight, Carrier    | PASS   |
| Air Export   | TLI/AE/2627//0074 | Dimensions, Volume Weight                 | PASS   |
| Land Import  | TLI/LI/2627//0003 | Vehicle, CMR, Origin/Dest, Packages       | PASS   |
| Land Export  | TLI/LE/2627//0001 | Same as Land Import                       | PASS   |

**SECTION 4: JOB DETAIL / WORKFLOW TEST RESULTS**

Tested all 8 wizard steps within existing Ocean Import and Air Import jobs. Each step was evaluated for field count, editability, and functional elements.

| Step | Name                  | Fields (OI/AI) | Status  | Notes                                                              |
|------|-----------------------|----------------|---------|--------------------------------------------------------------------|
| 1    | Basic Details         | 45 / 49        | PASS    | All fields editable, Select2 dropdowns working                     |
| 2    | Clearing Instructions | 16 / 47        | PASS    | Mostly readonly/display fields in OI; more editable in AI          |
| 3    | Delivery Note         | 25 / 40        | PASS    | Delivery details, dates, addresses                                 |
| 4    | Buying Charges        | 15 / 15        | WARNING | Charge table present but no "Add Row" button found                 |
| 5    | Selling Charges       | 15 / 15        | WARNING | Same issue - no "Add Row" button; some Select2 not initialized     |
| 6    | Purchase Invoice      | 2 / 2          | PASS    | Month/Year selector                                                |
| 7    | Sale Invoice          | 2 / 2          | PASS    | Month/Year selector                                                |
| 8    | Files/Supporting      | 3 / 3          | PASS    | URL-based file linking (not file upload), 10 existing file entries |

**Key Findings:**

- Steps 1-3 contain the bulk of job data fields and all function correctly with proper Select2 initialization
- Steps 4-5 (Buying/Selling Charges) have a structural issue: the charge tables exist but lack an "Add Row" button, limiting users to a single charge line per job
- Steps 6-7 (Purchase/Sale Invoice) use a month/year selector pattern for invoice generation
- Step 8 (Files) uses URL text fields rather than file upload, which may be by design for this system

SECTION 5: QUOTE & RATE SETUP TEST RESULTS

Quote Creation

Found "+ New Quote" button on Quotes page. Form has 14 fields: Quote No (auto), dates, customer (Select2), mode (Select2), ship type, cargo ready date, cargo type, commodity, packages, weights, CBM, remarks. Customer and Mode dropdowns filled successfully via Select2. Submission showed validation errors - some required fields not filled.

Status: **PARTIAL** - form works but requires all mandatory fields

Rate Database

"Add Rate" button found. Form has 10 fields: mode, rate type, carrier, buy rate, sell rate, unit, valid dates, status. Record creation: SUCCESSFUL - saved and redirected to list.

Status: **PASS**

Client Rates

"Add New" button found. ISSUE: Form loaded with 0 visible fields - may need prerequisite selection.

Status: **FAIL** - form not rendering properly

| Component      | Fields | Create Test                   | Status         |
|----------------|--------|-------------------------------|----------------|
| Quote Creation | 14     | Partial - validation required | <b>PARTIAL</b> |
| Rate Database  | 10     | Record created successfully   | <b>PASS</b>    |
| Client Rates   | 0      | Form not rendering            | <b>FAIL</b>    |

## SECTION 6: FINANCIAL REPORTS TEST RESULTS

All 9 financial report pages load correctly with data. Each report has proper date filtering and status dropdowns for data segmentation.

| Report              | Rows | Date Filter | Status Dropdown                    | Status | Notes                                       |
|---------------------|------|-------------|------------------------------------|--------|---------------------------------------------|
| Purchase Invoice    | 21   | YES         | All/Fully Paid/Partial/Unpaid/Void | PASS   | Action buttons: view, Add CRN, Save, Cancel |
| Sales Invoice       | 20   | YES         | All/Paid/Partial/Unpaid/CRN        | PASS   | Edit, Add CRN actions                       |
| Purchase Inv w/ VAT | 21   | YES         | Same dropdowns                     | PASS   | Filter works correctly                      |
| Sales Inv w/ VAT    | 20   | YES         | All/Paid/Partial/Unpaid            | PASS   | Filter works correctly                      |
| Ledger Report       | 2    | YES         | Party select                       | PASS   | Opening/closing balance                     |
| Customer Ageing     | 10   | YES         | Module + Customer filters          | PASS   | Typo: "IINVOICE NO"                         |
| Supplier Ageing     | 10   | YES         | Same filters                       | PASS   | Same structure                              |
| Jobs w/o Purch Inv  | 10   | YES         | Text search                        | PASS   | Jobs missing purchase invoices              |
| Jobs w/o Sales Inv  | 10   | YES         | Text search                        | PASS   | Jobs missing sales invoices                 |

**Key Columns Found:** All financial reports include Job No, Date, Party/Vendor name, Invoice No, Amount/Details, and Status fields. The Purchase and Sales Invoice pages include action buttons for viewing details, adding Credit Notes (CRN), and saving/canceling operations.

## SECTION 7: ACCOUNT PAGES TEST RESULTS

All 14 account pages load correctly. Debtor/Creditor pages show separate Due and Paid views. Due pages have checkbox-based selection for payment recording.

### Debtors (6 pages)

| Page                | Rows | Checkboxes | Payment Controls         | Notes                                    |
|---------------------|------|------------|--------------------------|------------------------------------------|
| Consignee Due       | 32   | 14         | Checkbox selection works | Most active debtor page                  |
| Consignee Paid      | 3    | None       | N/A (view only)          | Shows Paid Amount, Due Amount, Paid Date |
| Agent Due (Debtor)  | 11   | 5          | Checkbox selection works |                                          |
| Agent Paid (Debtor) | 0    | None       | N/A                      | No paid records                          |
| Shipper Due         | 0    | None       | N/A                      | No records                               |
| Shipper Paid        | 0    | None       | N/A                      | No records                               |

### Creditors (8 pages)

| Page                  | Rows | Checkboxes | Payment Controls         | Notes           |
|-----------------------|------|------------|--------------------------|-----------------|
| Shipping Line Due     | 14   | 8          | Checkbox selection works |                 |
| Shipping Line Paid    | 0    | None       | N/A                      | No paid records |
| Co-Loader Due         | 0    | None       | N/A                      | No records      |
| Co-Loader Paid        | 0    | None       | N/A                      | No records      |
| Supplier Due          | 17   | 9          | Checkbox selection works |                 |
| Supplier Paid         | 0    | None       | N/A                      | No paid records |
| Agent Due (Creditor)  | 3    | 1          | Checkbox selection works |                 |
| Agent Paid (Creditor) | 0    | None       | N/A                      | No paid records |

**Note:** Payment recording mechanism unclear - checkboxes exist but no explicit "Submit Payment" button found. May use a different UI pattern (modal, AJAX call).

SECTION 8: DSR REPORTS

All 5 DSR (Daily Status Report) pages load correctly. The Basic Graph page renders a Chart.js visualization. The remaining 4 pages show data grids with date-based filtering.

| Page             | Status | Chart          | Data           | Filters                               |
|------------------|--------|----------------|----------------|---------------------------------------|
| Basic Graph      | PASS   | YES (Chart.js) | Graph rendered | Year selector (FY 2023-2027)          |
| Ocean Import DSR | PASS   | No             | No records     | ETA/ETD/Delivery Date filter + Search |
| Ocean Export DSR | PASS   | No             | No records     | Same filter pattern                   |
| Air Import DSR   | PASS   | No             | No records     | Same filter pattern                   |
| Air Export DSR   | PASS   | No             | No records     | Same filter pattern                   |

**Note:** All DSR pages load but show no data records. This may indicate that DSR entries need to be created separately from job entries, or that the test data does not include DSR-specific records.

SECTION 9: HR MODULE

Employee List

11 existing employees visible in the employee list. "Add New" button present and functional.

Employee Creation Test

Status: **CREATED SUCCESSFULLY**

**Fields filled:** First Name (TestUser), Middle Name (Auto), Last Name (Test), Mobile (9876543210), Email (autotest@senaerp.com), User Type (Admin/User radio), Username (autotestuser), Password (Test@12345), Profile Image upload

Alert: "Record added successfully." - Verified in employee list.

| Test              | Fields   | Result                      | Status |
|-------------------|----------|-----------------------------|--------|
| Employee List     | N/A      | 11 employees visible        | PASS   |
| Employee Creation | 9 fields | Record created and verified | PASS   |

## SECTION 10: COMPLETE BUG LIST

12 bugs were identified during testing, categorized by severity. 3 are Critical (system-breaking), 4 are High (significant functionality impact), 3 are Medium (usability issues), and 2 are Low (minor improvements).

|                |                                                                                                            |                                                               |
|----------------|------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|
| <b>BUG-001</b> | <b>CRITICAL</b>                                                                                            | <b>Vendor Master HTTP 500</b>                                 |
| <b>Page:</b>   | Common Masters > Vendor Master                                                                             |                                                               |
| <b>Issue:</b>  | InvalidArgumentException - View [vendor.index] not found in Vendor.php line 70                             |                                                               |
| <b>Impact:</b> | Cannot access or manage any vendor records                                                                 |                                                               |
| <b>Fix:</b>    | Correct the view name in the controller                                                                    |                                                               |
| <b>BUG-002</b> | <b>CRITICAL</b>                                                                                            | <b>Activity Log HTTP 500</b>                                  |
| <b>Page:</b>   | Activity Log page                                                                                          |                                                               |
| <b>Issue:</b>  | QueryException - Unknown column 'u.FNAME' in ActivityLogController.php line 48                             |                                                               |
| <b>Impact:</b> | Cannot view activity/audit logs                                                                            |                                                               |
| <b>Fix:</b>    | Update SQL query to use correct column name                                                                |                                                               |
| <b>BUG-003</b> | <b>CRITICAL</b>                                                                                            | <b>Land Import/Export - Consignee Select2 Not Initialized</b> |
| <b>Page:</b>   | Land Import and Land Export job creation forms                                                             |                                                               |
| <b>Issue:</b>  | The Consignee dropdown has class "select2-cus" but Select2 is NOT initialized on it by the page JavaScript |                                                               |
| <b>Impact:</b> | Users cannot select a consignee when creating land jobs                                                    |                                                               |
| <b>Fix:</b>    | Add Select2 initialization for the consignee field on land job forms                                       |                                                               |
| <b>BUG-004</b> | <b>HIGH</b>                                                                                                | <b>Select2 Dropdown Stacking</b>                              |
| <b>Page:</b>   | All Ocean/Air job forms                                                                                    |                                                               |
| <b>Issue:</b>  | When opening multiple Select2 dropdowns in sequence, results from previous dropdowns are not cleared       |                                                               |
| <b>Impact:</b> | Users may accidentally select wrong values                                                                 |                                                               |
| <b>Fix:</b>    | Ensure Select2 properly clears previous results on close                                                   |                                                               |
| <b>BUG-005</b> | <b>HIGH</b>                                                                                                | <b>Buying/Selling Charges - No Add Row Button</b>             |
| <b>Page:</b>   | Job detail Steps 4 and 5 (Buying and Selling Charges)                                                      |                                                               |
| <b>Issue:</b>  | The charges table shows a single row but has no "Add Row" or "+" button                                    |                                                               |
| <b>Impact:</b> | Users can only enter one charge per job                                                                    |                                                               |
| <b>Fix:</b>    | Add an "Add Row" button to the charges table                                                               |                                                               |
| <b>BUG-006</b> | <b>HIGH</b>                                                                                                | <b>Selling Charges - PP/CC Select2 Not Initialized</b>        |
| <b>Page:</b>   | Job detail Step 5 (Selling Charges)                                                                        |                                                               |
| <b>Issue:</b>  | The sl_ppcc (Prepaid/Collect) Select2 dropdown is not initialized                                          |                                                               |
| <b>Impact:</b> | Cannot set PP/CC status for selling charges                                                                |                                                               |
| <b>Fix:</b>    | Initialize Select2 on all dropdowns in the selling charges tab                                             |                                                               |
| <b>BUG-007</b> | <b>HIGH</b>                                                                                                | <b>Client Rates - Form Not Rendering</b>                      |
| <b>Page:</b>   | Quote Setup > Client Rates                                                                                 |                                                               |
| <b>Issue:</b>  | "Add New" button exists but the form loads with 0 visible fields                                           |                                                               |
| <b>Impact:</b> | Cannot create new client rate records                                                                      |                                                               |
| <b>Fix:</b>    | Investigate why form fields are not rendered                                                               |                                                               |
| <b>BUG-008</b> | <b>MEDIUM</b>                                                                                              | <b>Ledger Group - Empty Add Modal</b>                         |
| <b>Page:</b>   | Common Masters > Ledger Group                                                                              |                                                               |
| <b>Issue:</b>  | "Add New" modal opens but contains no form fields                                                          |                                                               |

**Impact:** Cannot add new ledger groups  
**Fix:** Add form fields to the add modal

|                |               |                                             |
|----------------|---------------|---------------------------------------------|
| <b>BUG-009</b> | <b>MEDIUM</b> | <b>Customer Ageing Report - Column Typo</b> |
|----------------|---------------|---------------------------------------------|

**Page:** Financial Reports > Customer Ageing  
**Issue:** Column header shows "IINVOICE NO" (double I) instead of "INVOICE NO"  
**Impact:** Display error in report header  
**Fix:** Correct the typo in the view template

|                |               |                                                  |
|----------------|---------------|--------------------------------------------------|
| <b>BUG-010</b> | <b>MEDIUM</b> | <b>Date Filters on Account Pages Not Working</b> |
|----------------|---------------|--------------------------------------------------|

**Page:** All Debtor/Creditor Due/Paid pages  
**Issue:** Date input fields use a datepicker widget that doesn't accept direct text input  
**Impact:** Users may have difficulty filtering account data by date  
**Fix:** Ensure consistent date picker implementation

|                |            |                                     |
|----------------|------------|-------------------------------------|
| <b>BUG-011</b> | <b>LOW</b> | <b>Payment Recording UX Unclear</b> |
|----------------|------------|-------------------------------------|

**Page:** All "Due" account pages (Debtors/Creditors)  
**Issue:** Checkboxes exist for selecting invoices but no explicit "Record Payment" button is visible  
**Impact:** Users may not understand how to record payments  
**Fix:** Add clear payment submission button or better UX guidance

|                |            |                                                          |
|----------------|------------|----------------------------------------------------------|
| <b>BUG-012</b> | <b>LOW</b> | <b>Files Tab Uses URL Linking Instead of File Upload</b> |
|----------------|------------|----------------------------------------------------------|

**Page:** Job detail Step 8 (Files/Supporting)  
**Issue:** The files section uses URL text fields instead of a file upload control  
**Impact:** Users must host files elsewhere and paste URLs instead of directly uploading  
**Fix:** Consider adding a file upload control

**SECTION 11: RECOMMENDATIONS****Priority Fixes (Immediate)**

| # | Priority | Recommendation                                                                        | Bug Ref |
|---|----------|---------------------------------------------------------------------------------------|---------|
| 1 | CRITICAL | Fix Vendor Master view name - InvalidArgumentException prevents all vendor management | BUG-001 |
| 2 | CRITICAL | Fix Activity Log SQL query - Unknown column prevents audit log viewing                | BUG-002 |
| 3 | CRITICAL | Initialize Select2 on Land Import/Export consignee field                              | BUG-003 |

**High Priority Fixes**

| # | Priority | Recommendation                                        | Bug Ref |
|---|----------|-------------------------------------------------------|---------|
| 4 | HIGH     | Fix Select2 stacking issue across all forms           | BUG-004 |
| 5 | HIGH     | Add "Add Row" functionality to Buying/Selling Charges | BUG-005 |
| 6 | HIGH     | Fix Selling Charges PP/CC Select2 initialization      | BUG-006 |
| 7 | HIGH     | Fix Client Rates form rendering                       | BUG-007 |

**Medium and Low Priority**

| #  | Priority | Recommendation                                           | Bug Ref |
|----|----------|----------------------------------------------------------|---------|
| 8  | MEDIUM   | Fix column typo in Customer Ageing report ("INVOICE NO") | BUG-009 |
| 9  | MEDIUM   | Fix Ledger Group empty modal - add form fields           | BUG-008 |
| 10 | MEDIUM   | Standardize date picker implementation across all pages  | BUG-010 |
| 11 | LOW      | Add clear payment submission UX on Due pages             | BUG-011 |
| 12 | LOW      | Consider file upload for job supporting documents        | BUG-012 |

**General Improvements**

1. Add validation error messages that specify which fields are missing
2. Pre-populate DSR report data from job entries
3. Add bulk export (Excel/PDF) for all report pages
4. Add confirmation dialogs for record creation/deletion

SECTION 12: TEST SCRIPTS DELIVERED

8 Playwright test scripts were developed and delivered for future regression and upgrade testing. All scripts are available in the GitHub repository.

| # | Script                   | Purpose                                      | Coverage       |
|---|--------------------------|----------------------------------------------|----------------|
| 1 | test_all_pages.py        | Page load testing                            | 72 pages       |
| 2 | test_crud_masters.py     | CRUD on master pages                         | 20 pages       |
| 3 | test_jobs_and_reports.py | Job workflows, reports, accounts overview    | Jobs + Reports |
| 4 | test_remaining_jobs.py   | Ocean Export, Air Export, Land Import/Export | 4 job types    |
| 5 | test_job_details.py      | Job detail tabs, quotes, rates               | 8 wizard steps |
| 6 | test_reports_accounts.py | Financial reports, debtors/creditors, DSR    | 28 pages       |
| 7 | test_create_records.py   | Record creation (Employee, Ocean/Air Import) | 3 record types |
| 8 | test_deep_jobs.py        | Select2 dropdown analysis and form structure | Form discovery |

**GitHub Repository:** <https://github.com/anirudhatalmale6-alt/sena-erp-qa-tests>

**How to Run Tests:**

1. Install Python 3.10+ and pip install playwright
2. Run: playwright install chromium
3. Execute: python test\_all\_pages.py (or any specific test script)
4. Results are saved as JSON files in the same directory

TESTING COMPLETE

72 pages tested | 6 job types created | 12 bugs documented | 8 test scripts delivered
